SUMMARY

A driven individual with a strong desire to learn and grow through hands-on experience. Enjoys solving problems, embracing new challenges, and improving skills with dedication and persistence. Adapts quickly to new technologies and thrives in team environments, always striving for progress and meaningful contributions

EDUCATION

- Jamia Hamdard University** Delhi, India
Bachelor of Technology - Computer Science Engineering; GPA: 7.62 Sep 2021 - May 2025
Relevant Courses: Data Structures and Algorithms, Object Oriented Programming, Database Management System, Operating System, Computer Networks

SKILLS SUMMARY

- Languages:** C++, Python, JavaScript, TypeScript, SQL, NoSQL
- Frameworks:** HTML/CSS, Tailwind, ReactJS, ReduxJS, NodeJS, ExpressJS, Jest
- Tools:** GIT, Github, Apache Kafka, Postman
- Databases:** MySQL, MongoDB, Redis

EXPERIENCE

- CodeSoft** Remote
Frontend Developer (Intern) Jan 2024 - Feb 2024
 - : Resolved technical challenges under tight deadlines, improving troubleshooting skills and understanding complex issues. This fueled creativity, driving me to develop solutions while learning and adapting to new technologies.
 - : Contributed to project progress by swiftly adapting to evolving tasks, ensuring high-quality outcomes, and consistently meeting deadlines. Collaborated effectively with the team to maintain a smooth workflow and achieve project goals.
 - : Managed tasks independently from start to finish, demonstrating strong ownership and accountability while continuously learning and applying new solutions to meet project goals and enhance overall efficiency.

PROJECTS

- Hirrd (ReactJS, Supabase):** Developed a job portal to streamline job applications and improve hiring efficiency. Faced authentication security issues and tackled them using Clerk authentication and optimized API performance for seamless user interactions. Implemented real-time updates and secure database operations, ensuring a smooth experience for recruiters and candidates. Learned backend integration, database management, and debugging, strengthening my ability to create scalable web applications. (Nov '24)
- Wanderlust (NodeJs, ExpressJs, MongoDB):** Created a hotel search and review platform with an interactive and user-friendly interface. Overcame data structuring challenges by implementing MongoDB Atlas for optimized cloud storage and improving database query efficiency. Integrated MVC architecture to enhance maintainability and scalability. Strengthened backend development, query optimization, and cloud database management, improving the platform's performance and reliability. (Feb '24)
- Urban-Cart (ReactJS, Strapi):** Built an e-commerce platform with Strapi CMS, enabling seamless product management and real-time content updates. Faced content handling issues, which I resolved by implementing a headless CMS for structured data management and improved frontend optimization. Designed an intuitive UI/UX, ensuring smooth navigation and an engaging shopping experience. Gained expertise in state management, API handling, and CMS integration. (Aug '24)
- Expense Tracker (ReactJS, ChartJS):** Designed an expense tracker with real-time financial visualization, helping users manage and analyze their spending effectively. Faced challenges in dynamic data updates and financial tracking, which I solved using ChartJS for interactive analytics and optimized React state management. Integrated MongoDB for seamless and secure data storage. Strengthened my skills in data visualization, financial analytics, and full-stack development. (Mar '24)

HONORS AND AWARDS

- Solved 300+ DSA problems on platforms like LeetCode, GeeksforGeeks, and CodeStudio
- Secured a rank in the top 1.5% among 1.4 lakh participants in CodeKaze 2024 - Sep, 2024
